

Install visual studio community

1. Go to <https://www.visualstudio.com/cs/downloads/>
2. Download Visual Studio Community 2017 installer (2015 also possible)
3. Run the installer
4. Select ASP.NET and web development
Choose preferred language
Choose location
Click install

5. Open visual studio
6. Tools -> Extensions and updates -> Online
Search for **NUnit 3 Test Adapter**
Install extensions

Restart Visual studio

Clone repository from github

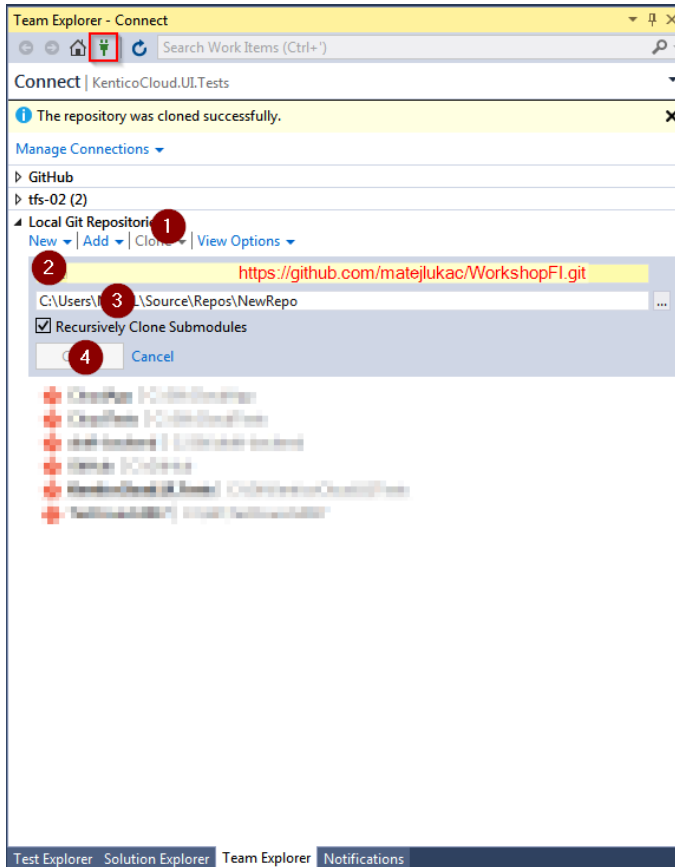

1. Open Visual studio
2. Team -> Manage connections

Select **Clone** link

Enter <https://github.com/matejlukac/WorkshopFI.git> as repository URL

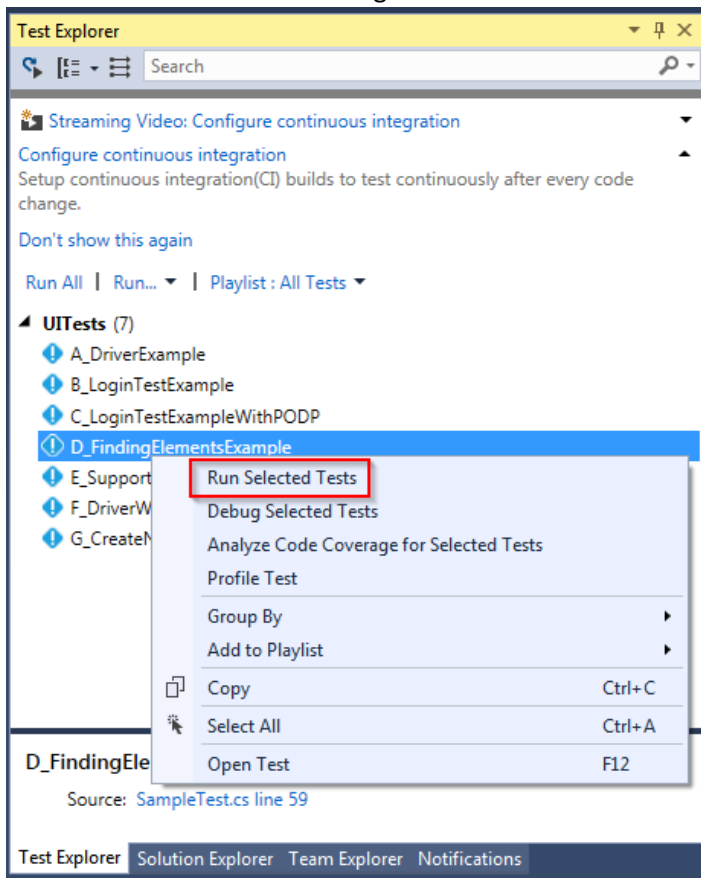

Set path on your computer where repository should be cloned (C:\...)

Click **Clone** button

Open repository and run tests

1. Navigate to the folder with cloned repository
2. Open .sln file in Visual Studio (double click)
3. Build -> Rebuild solution
4. Test -> Windows -> Test explorer
5. Run the chosen test with the right click

6. Tools -> Options -> Text Editor -> C/C++ -> Enumerate comment tasks = True
7. View -> Task List (TODO tasks will be implemented during the workshop)
